DTCC

OBLIGATON WAREHOUSE

SWIFT MT599 SPECIFICATIONS

JULY 1, 2014

DOCUMENT REVISION HISTORY

Date	Version	Change Description
May 2012	6	No changes for this version.
June 2013	7	Addition of POFC to notify participants that Pair Off processing has been completed.
July 2014	8	Updated POFC description and removed time at the end of POFC example to display only the current business date.

MT599 FIELD SPECIFICATIONS

The following table shows the outbound MT599 field specifications:

Note:
See the ISO header document.

Block/Tag	Notes
20	**Senders Message Reference** This field contains the senders message reference number. It is mandatory and contains a unique number to unambiguously identify each message sent from Obligation Warehouse. (This is a communications message number, not an obligation number). **Note**: While the SWIFT message accommodates both Upper and Lower case alphanumeric and certain symbols, for Obligation Warehouse purposes, this field is populated with an upper case alphanumeric value. It does not contain symbols or hyphens. Example **:20:SEME/20091031070015**
79	**Narrative** This field contains the various administrative message data, including the type of message, using the following qualifiers: **GADM** – Indicates that this is an administrative message being sent by Obligation Warehouse. **/PREP/** – Contains the message preparation date and time. **/GSOD/** – Indicates that this MT599 message is Obligation Warehouses beginning of day notification for the business date noted. Subsequent to receiving this message, participants can begin to send transactions to Obligation Warehouse to be included in that days processing. Any messages received by Obligation Warehouse after this point, and before the end-of-day submission cutoff results in immediate acknowledgement/rejection. Obligation Warehouse also, at this point, begin sending acknowledgement/rejection MT509 output for all obligations received after the prior business days cutoff point. **/EDCS/** – Indicates that this MT599 message is Obligation Warehouses notification to the participant that any obligations received by Obligation Warehouse after this time is not included in that days processing. All obligations received by Obligation Warehouse after this cutoff (until the next nights cutoff/ “EDCS” message) are included in processing for the next processing/obligation date indicated below (following the qualifier /NXTD/). **/EODC/** – Indicates that this MT599 message is Obligation Warehouses notification to participants that Obligation Warehouse has completed its batch processes and no more interactive matching output is generated for Obligation Warehouse for that business day. Any matching-related output sent by Obligation Warehouse after this point (through the generation of the next EODC message) is for the business day indicated below (following the qualifier /NXTD/).

Block/Tag	Notes
	/NXTD/ – Provides the next valid Obligation Warehouse obligation submission date and is included on all Obligation Warehouse end-of-day messages. **/NXTR/** – Provides the next valid RECAP date and is included on all Obligation Warehouse end-of-day messages. **/CNSE** – Indicates that this MT599 message is Obligation Warehouses notification to the participant that CNS eligibility check has been completed. **/POFC** – Indicates that this MT599 message is Obligation Warehouses notification to the participant that Pair Off processing has been completed for the displayed business date. Example **:79:GADM/PREP/20090331070015** **/GSOD/20090331** **:79:GADM/PREP/20090331200150** **/EDCS/20090331** **/NXTD/20090401** **/NXTR/20090701** **:79:GADM/PREP/20100618120515** **/CNSE/20100707113024** **:79:GADM/PREP/20100618120515** **/POFC/20100707**
